

Interview of Pete Czerwinski (UK)

Participant in the Pirate Box workshop led by Benjamin Cadon @ Access Space Network, Sheffield (NO), 4.4.2014

> What attracted you in this workshop and what were your expectations?

The wireless networking part. The idea is to set one of these pirate boxes at Access Space for the users of the space. I found out a lot about wireless networking today.

> Can you describe what things you learned in this workshop? What did you learn that was unexpected?

To be fair we didn't get it working, so I learned an awful lot about setting up wireless networks. Ironically because it did not work, I had a better learning experience.

> What are you going to do with this knowledge now?

Hopefully apply it to what I said previously (laughter)

> Would you like to develop these skills/knowledge further or was what you learned sufficient for your own objectives?

Yeah, yeah yeah, thats what it is all about, learning new skills and passing them on to other people. Learning and sharing.

> Will you collaborate in future with the people you met in the workshop?

Yeah, probably. Certainly with the two guys doing music cause that ties in with Sheffield Hardware Hackers and makers.
