

## **Interview of Erik Parr (US)**

**Participant in the Psychoheliophysicists - Sun Tongs workshop led by Benjamin Freeth, Annika Haas & John Bowers @ Pikel, Bergen (NO), 22.11.2013**

### **> What attracted you in this workshop and what were your expectations?**

I was attracted to work with the medium of light and thinking of light as a material and I like the sun!

### **> Can you describe what things you learned in this workshop? What did you learn that was unexpected?**

There is some theory, based on conceptual projects about the sun, and the magnetic waves of the sun that was interesting and I was not expecting it. We learned how to use the software called pure data and connect that to Arduino.

### **> What are you going to do with this knowledge now?**

I am just going to use it to enrich my winter life!

### **> Would you like to develop these skills/knowledge further or was what you learned sufficient for your own objectives?**

I would like to develop some of the ideas further on my own. The workshop enabled me to pursue it on my own.

### **> Will you collaborate in future with the people you met in the workshop?**

It could because I met very interesting people.
