

Interview of Ellen Ringstad

Participant in the Ghost detector Synth workshop led by Andy Bolus (FR / UK) at the Icelandic Arts Academy on 12.9.2014

What attracted you in this workshop and what were your expectations?

I honestly didn't have many expectations for the workshop. I came, I saw and I conquered! It was fun! Haha.

What are you going to do with this knowledge now?

It was a giving experience, both atmospherically and in terms of playing around with electronics - which I haven't done for twenty years. I think it definitively triggered my interest in the field, and at the same time made me very aware of my limitations. The DIY-approach is quite liberating though.

Would you like to develop these skills/knowledge further or was what you learned sufficient for your own objectives?

I am always up for learning new skills!

Will you collaborate in the future with the people you met in the workshop?

Absolutely - fun people to be around :-). Thanks for the workshop Andy!
